

HIRLAM based NWP environment at Estonian Meteorological Hydrological Institute

Aarne Männik

Estonian Meteorological Hydrological Institute,
University of Tartu

- Two level system with ETA and ETB areas
- **ETA II**
 - 4 x 54 h forecasts
 - 366x280x60 11.1 km resolution
 - Time-step 300 s
 - 3DVAR
 - Boundaries from ECMWF
- **ETB II**
 - 2 x 36 h forecasts.
 - 306x306x60 3.3 km resolution
 - Time-step 120 s
 - 3DVAR
 - Boundaries from ETA
